SC PERFORMANCE GOAL

2010 Goal:

By 2010, SC's student achievement will be ranked in the top half of the states nationally. To achieve this goal, we must become one of the fastest improving systems in the country.

2020 Vision:

By 2020 all students will graduate with the knowledge and skills necessary to compete successfully in the global economy, participate in a democratic society and contribute positively as members of families and communities.

REPORT OF PRINCIPAL AND SCHOOL IMPROVEMENT COUNCIL

The ultimate goal of W. G. Sanders Middle School is to increase student achievement in English language arts, mathematics, science, and social studies. According to our data, student achievement continues to increase, especially in science and social studies. The W. G. Sanders Middle School Leadership Team is elated to report that over the past three years there has been a 5.3% increase in students scoring proficient in ELA, an 8.7% increase at the same level for social studies, and a 5.3% increase at the same level for science. As the team planned for the current year, goals were set to improve performance, particularly for all ELA students, for all science students, and for 8th grade math students. The plan for improvement became a part of our Focused School Renewal Plan whereby improvements were based on MAP test results and science benchmark results.

Our goal was to experience additional academic gains in all core courses. The basic obstacles for reaching this goal was having students from an impoverished background increase their literacy. Our students enter our school with deficiencies in reading, writing, listening, speaking, and thinking at high levels. In order to have our students reach their optimal literacy potential, we planned initiatives that would provide students with instruction that was rigorous and engaging so that they would be literate in all subject areas. Here, we were presented with a second obstacle, which was teacher knowledge and teacher training. To address this deficiency, we actively engaged in TargetTeach strategies that address the gaps in teacher instruction. Also, we implemented a supervisory model that provides additional support and resources to those teachers who were not experiencing academic success with their students.

As a result of the above strategies, we experienced an increase in teacher commitment. Our early release days became more focused as we moved literacy to the forefront. We implemented safety nets for our students by providing additional morning and afternoon tutorial sessions.

Parent communication was improved with weekly newsletters to parents and additional parent night activities that focused on improving literacy. Teachers continued to use eChalk as a means of communicating instruction with parents; however, the use was increased as teachers were provided with ongoing monthly staff developing in this communications program. We expanded our IGPro system with the use of Parent Connect, whereby parents are now able to view student progress on a daily basis.

Our challenges for the upcoming year will continue to be improving literacy within an economically-deprived community, attracting and sustaining quality teachers, and sustaining community and parental involvement. With the active guidance of our School Improvement Council, we are excited about the positive changes that we have for our future.
